Overview

What are Europe's 'flexible buildings & resilient grids' & 'mission Solar'?

Complementing SolarPower Europe's flagship flexibility reports, like the annual 'EU Battery Energy Storage Systems Outlook', or Mission Solar 2040, the Association has published two further reports. 'Flexible Buildings, Resilient Grids' and 'Embracing the benefits of Hybrid PV systems' focus on distributed and utility flexibility respectively.

Are solar and storage delivering European energy security and competitiveness?

The new reports underline the potential of solar and storage delivering European energy security and competitiveness. 'Embracing the benefits of Hybrid PV systems' – which includes solar hybrid projects with storage, wind, or both – estimates that hybrid projects have a 10% lower Levelised Cost of Electricity compared to standalone projects.

What is the European energy storage inventory?

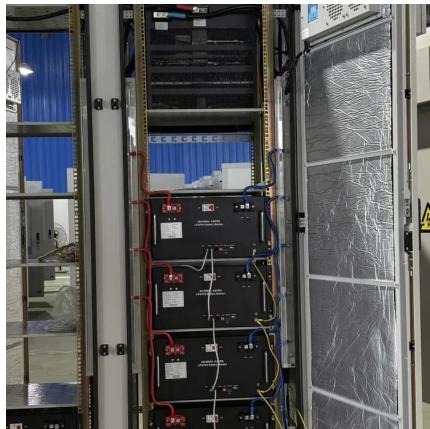

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources. Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the first of its kind at European level to show all forms of clean energy storage solutions.

Who is Solarpower Europe?

Walburga Hemetsberger, CEO of SolarPower Europe (she/her) said: "SolarPower Europe has represented the full European solar value chain for 40 years. From 50 MW of solar globally in 1985, to 350 GW alone in the EU last year, we are so proud to be powering the equivalent of 75 million EU households today."
