

Special-shaped solar panels

Overview

What shapes can custom small solar panels be?

At Voltaic, we manufacture custom and standard small solar panels and while most are rectangular, we have experience designing and deploying a full range of interesting shapes and sizes. Most standard small solar panels are rectangular in shape because they are easier to manufacture and offer the most efficient use of space.

What are the different types of small Solar panels?

At Voltaic, we manufacture a full range of interesting shapes and sizes of small solar panels, including custom and standard ones. While most are rectangular for easier manufacturing and efficient space use, we have experience designing and deploying various shapes.

Can you get solar panels in different shapes?

Yes, absolutely! While the traditional rectangular shape is common, solar panels now come in various shapes beyond the conventional. Triangles, circles, and hexagons are innovative shapes that offer functional efficiency and aesthetic appeal. What is the most efficient solar panel shape?
