Swedish solar cell modules

Overview

When will a 200MW solar cell plant be built in Sweden?

Image: Midsummer Swedish solar manufacturer Midsummer has selected the municipality of Flen in central Sweden to build a 200MW thin-film solar cell manufacturing facility. The company will take over the premises in September this year, and expects to begin production in 2026, before scaling up to full production capacity in 2028.

Who makes swemodeule solar modules?

Solar Modules produced at SweModule by Renewable Sun Energy Sweden AB are designed for various markets and applications. High quality production, combined with strictest process control, ensure maximum lifespan and the highest performance. Next generation goes of grid. Read about the fully solar-panel driven Villa.

Where are solar modules made?

It's one of the most modern and automated module production facility in Europe Solar Modules produced at SweModule by Renewable Sun Energy Sweden AB are designed for various markets and applications. High quality production, combined with strictest process control, ensure maximum lifespan and the highest performance. Next generation goes of grid.

Where are Midsummer solar cells made?

Midsummer's solar cells are a Swedish innovation and are manufactured both in Sweden and Italy. With a minimal weight of only 3kg per square meter, our solar cells enable installation on roofs with weight restrictions without compromising the structural integrity of the roof.

Swedish solar cell modules

Untitled [iea-pvps]

Nov 8, 2023 · This stability in module prices was primarily attributed to the introduction of import duties on Chinese PV modules and cells by the European Commission in 2013 [14].

Midsummer and the EU sign agreement on EU grant for new Swedish solar

In July the EU Innovation Fund announced that it had selected the Swedish manufacturer of solar cells Midsummer for funding of EUR 32.3 million for a new solar cell factory in Sweden with the ...
