

# The impact of solar container communication station inverters on operators

## Overview

---

Are Chinese-made solar inverters a supply-chain vulnerability?

Leading renewable energy operators worldwide are confronting a disturbing supply-chain vulnerability: undocumented communication modules found in Chinese-made solar inverters and batteries.

Which power line communication options are implemented in different solar installations?

Figure 1 shows typical power line communication options implemented in different solar installations. These installations can be divided into communication on DC lines (red) and communication on AC lines (blue).

Are hidden radios in Chinese-manufactured inverters a threat?

Hidden radios in Chinese-manufactured inverters expose a real supply-chain vulnerability that could undermine grid stability and corporate reputation. Maya Security specializes in operational-technology resilience assessments, uncovering undisclosed hardware risks before they become emergencies.

What is MV-inverter station?

highlight of this chain is the MV-inverter station, which comprises the switchgear, transformer, and inverter. With its broad portfolio of switchgear, Siemens offers the right solution for any application – reliable and maintenance-free, for any climate.
