

The price of a solar panel in Amsterdam

Overview

Why are solar panels so expensive in the Netherlands?

From transportation to installation, it all goes into the price. The solar panels may become cheaper, the cost of labor in the Netherlands increases dramatically. So you may be just as expensive," says importer Peter Desmet.

Should you install solar panels in the Netherlands?

Another reason to consider installing solar panels in the Netherlands right now is that the Dutch government will actually foot part of the bill. Currently, the Dutch government is offering a sustainable energy investment grant (ISDE) to compensate for the cost of energy-saving and sustainable installations.

How much do solar panels cost?

In addition, the specifications of the panels (such as power) and the cost of installation also play a role. On average, you pay around €500 to €600 per solar panel, including installation. The cost of solar panels depends on the number of panels and the power per panel. In general, the more panels you buy, the cheaper the price per panel becomes.

What are the different types of solar panels in the Netherlands?

There are three main types of solar panels you can get in the Netherlands: monocrystalline panels, polycrystalline panels, and thin film panels. Monocrystalline panels are made using silicon and have an aluminium frame. These panels are more efficient in producing electricity from sunlight because of the structure of the cells.
