

There is a 5G base station in the courtyard of Castries

Overview

How many 5G stations are there in China?

As of January 2025, China had 4.25 million 5G base stations, a figure expected to reach 4.5 million by the end of the year. More than 1 billion 5G connections are live, accounting for over 50% of all mobile connections in the country, the GSMA executive added. “We see the impact everywhere,” he said.

Is China launching a 5g-ad network?

China Unicom and Huawei have created a 5G-Advanced intelligent network serving more than 10 million people in Beijing, while China Telecom’s private 5G-Ad network at Tianjin Port has increased operational efficiency by 20%, he said. “The potential is clear. The next phase is about scale,” Badrinath said.

Should the telecom industry complete the 5G journey before 6G?

SHANGHAI—The global telecom industry must complete the 5G journey before turning fully to future technologies like 6G, said GSMA director general Vivek Badrinath during his keynote at Mobile World Congress Shanghai 2025, taking place this week in the Chinese city.

Is 5G standalone the foundation for next-level services?

Badrinath described 5G Standalone (5G SA) as the foundation for next-level services. “To complete this journey we need to finish the rollout of 5G standalone across the world,” he said. “With faster speeds, ultra-low latency and enhanced network slicing capabilities, completing the 5G journey will open up even more opportunities for growth.”
