Tuvalu solar panels solar power generation

Overview

Does Tuvalu need solar energy?

In response, Tuvalu has prioritized renewable energy as a dual strategy for mitigating emissions and adapting to climate impacts. Solar energy, in particular, is well-suited to Tuvalu's tropical climate, which offers abundant sunlight throughout the year.

How much energy does Tuvalu use a year?

Like many Small Island Developing States (SIDS), Tuvalu has been heavily reliant on imported fuel for its diesel-based power generation system. Through this new FSPV system 174.2 megawatts per hour of electricity will be generated each year, meeting two percent of Funafuti's annual energy demand.

What are Tuvalu's energy sources?

However, the majority of Tuvalu's energy sources are imported fossil fuels. Petroleum has been the largest energy source since the 1990s, replacing biomass. In 2021, fossil fuels accounted for 96 percent of Tuvalu's total energy supply, while solar and other renewable energy sources accounted for 4 percent.

Can Tuvalu harness the power of the Sun?

"By harnessing the power of the sun, we are taking control of our energy needs and setting an example for other small island nations facing similar challenges." Beyond the solar farm, Tuvalu is also exploring wind energy opportunities. Preliminary assessments on several outer islands are underway to determine the feasibility of wind power.
