

# **Uninterruptible Power Supply EPO**

## Overview

---

Emergency Power Off (EPO) functionality enables an uninterruptible power supply and other related equipment such as generators to be remotely shut down in the event of a fire or the need for a building evacuation. What is power continuity (EPO)?

Power Continuity | UPS System. WHAT ARE EPO OPERATIONS?

EPO (Emergency Power Off): this feature on UPS systems can cause many problems to the smooth running of the power protection installation. Primarily, the feature enables the UPS system to be 'made safe' in the event of an emergency.

When should you use emergency power off (EPO) with a UPS system?

Emergency Power Off (EPO) functionality enables an uninterruptible power supply and other related equipment such as generators to be remotely shut down in the event of a fire or the need for a building evacuation.

What is emergency power off (EPO)?

Emergency Power Off (EPO) functionality enables an uninterruptible power supply and other related equipment such as generators to be remotely shut down in the event of a fire or building evacuation. The process is known by several other terms, including Emergency Shutdown (EDS), Remote Shutdown (RSD) and Remote Emergency Power Off (REPO).

What is an uninterruptible power supply (UPS) system?

Power distortions such as power interruptions, voltage sags and swells, voltage spikes, and voltage harmonics can cause severe impacts on sensitive loads in the electric systems. Uninterruptible power supply (UPS) systems are used to provide uninterrupted, reliable, and high-quality power for these sensitive loads.

## Uninterruptible Power Supply EPO
