

Uninterruptible Power Supply Freezer

Overview

What is an Uninterruptible Power Supply (UPS)?

An Uninterruptible Power Supply (UPS) can supply voltage long enough for you to shut all your equipment down in the event of a power failure or power line down in a storm. It is better to shut off equipment normally than to have it suddenly lose power.

How does the ups refrigerator battery backup work?

The UPS refrigerator battery backup will power the refrigerator/freezer with 110-volt AC until a power outage occurs. Then it will switch voltage automatically and power the FridgeFreeze unit from the UPS System's on-board battery. Weight 60 lb. • 27.3 kg.

How long does a fridgefreeze battery backup system last?

The FridgeFreeze Standard UPS (Uninterruptible Power Supply) Battery Backup System can keep your medical refrigerator and freezer operational with up to 4 days of continuous power.

Why do I need a battery backup for my refrigerator freezer?

Battery backup allows for the safe storage of vaccines including covid-19, influenza, varicella, MMR, typhoid and more. This battery backup technology also isolates your FridgeFreeze unit from unwanted power spikes and the damaging effects of lightning. We manufacture 2 models of medical refrigerator freezer UPS battery backup systems.
