

Uninterruptible power supply 12 volt

Overview

What is a 12 volt uninterruptible power supply?

12 Volt 12A Uninterruptible power supplies includes a 5AH battery for 12V buses, cars and other vehicles to give a robust battery back-up for equipment in emergency vehicles. (BBU) 12 volt DC UPS module or battery backup (BBU) keeps 12 volt equipment alive in cars, buses, trucks and taxis using an internal sealed lead acid battery.

How does a DC UPS work?

USB and RS232 interfaces make data communication with controllers/SPS or PC based systems available. With the aid of the HID Battery Parameter Software, settings can be comfortably made at the DC UPS. In addition, a comprehensive instruction set enables the direct readout of sensor values and the setting of parameters.

What types of UPS modules are available?

Furthermore, open frame variants for a direct system integration (UPSI), compact and maintenance-free DC UPS modules for DIN-Rail mounting (UPSIC), combined solutions with integrated energy storage (UPSI-DP) and IP67 outdoor versions (UPSI-IP) are available.

What makes UPSI a good energy storage system?

Due of the used energy storage technologies the UPSI system is characterised by low total cost of ownership (TCO) and high safety and longevity.
