

Uninterruptible power supply for the whole house

Overview

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) is one of the best ways to protect sensitive electronics like desktop computers from irretrievable data loss and permanent damage. But what about everything else in your house that plugs into the wall?

Read on to learn about the benefits of uninterrupted power for your home.
What Is a UPS?

.

Do you need an uninterruptible power supply?

But precision electronics like computers, gaming consoles, Smart TVs, and external hard drives are at far greater risk of damage from power interruptions than many home appliances. An uninterruptible power supply (UPS) is one of the best ways to protect sensitive electronics like desktop computers from irretrievable data loss and permanent damage.

What is an uninterruptible power source up?

A business with servers and networking equipment may need an uninterruptible power source ups rated at 3000 VA or higher. Runtime refers to how long the UPS can supply power to connected devices during an outage. The runtime varies depending on the size of the battery and the load placed on the uninterruptible power source.

How does an uninterrupted power supply work?

An uninterrupted power supply works by constantly monitoring output from the alternating current (AC) outlet the UPS is plugged into and automatically switching to direct current (DC) electricity from an onboard backup battery during interruptions such as voltage drops and blackouts.
