

Vatican Communications first 5G base station at sea

Overview

What is a maritime 5G network?

New maritime 5G network set to generate 100 million yuan in revenue by the end of the 2022 In Ningde, Fujian Province, China Mobile and Huawei have built a maritime 5G network that stretches 50 km out to sea and is supporting maritime management fishing, tourism and energy applications, as well as consumer services.

What is a floating 5G base station?

JET Engineering System Solutions has deployed a floating 5G base station off the UK coast of Dorset. The buoy, named JET-4 Babel, is a floating 5G base station, transmitting coverage for devices to connect to and extending the distance from the shore that a 5G signal can be accessed.

What is 5G marine network & how does it work?

In Ningde, China Mobile and Huawei have built a showcase 5G marine network to provide coverage up to 50 km offshore. The network employs tall radio masts transmitting over a mixture of frequency bands, supplemented by network technologies and techniques designed to optimise coverage at sea.

How does a 5G network work?

The network employs tall radio masts transmitting over a mixture of frequency bands, supplemented by network technologies and techniques designed to optimise coverage at sea. The two companies are using 700 MHz spectrum for the foundation network, supplemented by 5G services at 2.6 GHz and 4.9 GHz for greater capacity.
