Water pumps that directly match solar panels

Overview

Is a solar powered water pump a good choice?

In fact, we see that most water pumping applications are well suited for solar systems that are directly connected to solar panels. Let's chat through a few examples of when a solar powered pump might be a better option compared to its AC counterpart: Example 1: Josh's utility company has hiked up rates for the third time in two years.

Does a solar powered water pump need a big inverter?

With our DC Direct Solar Pumps, there's no need for a big inverter to power the pump. In fact, we see that most water pumping applications are well suited for solar systems that are directly connected to solar panels. Let's chat through a few examples of when a solar powered pump might be a better option compared to its AC counterpart:.

What is a solar surface pump kit?

Solar Surface Pump Kits are specialized systems designed to harness solar energy for water pumping applications. These kits typically include a solar surface water pump, solar panels, and necessary accessories to facilitate efficient water movement for various uses such as irrigation, livestock watering, and residential needs.

How to use a solar water pump?

The Sunsbell Solar Water Pump is ideal for a garden patio or pond. It comes in with a 3 m long cable and 4 different nozzle heads. It's very easy to use- just immerse the pump under water, place the panel under full sunlight and it will start automatically. Besides, the beautiful waterfall will give your garden a unique, special look.
