

Western European solar container outdoor power BESS

Overview

Will 10x Bess be installed by 2030?

Battery Storage Europe Platform launched last week with a call to 10X BESS installations by 2030. Image: SolarPower Europe The European Union (EU) will not meet its 2030 clean energy targets unless cumulative battery storage deployments rapidly accelerate, SolarPower Europe has said.

Is CATL Teneo energy storage a Bess system?

“CATL has always been at the forefront of the energy transition,” said Amanda Xu, CTO ESS and president of ESS Europe CATL. “To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration and flexible deployment, we bring the latest CATL TENER energy storage solution.

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe’s total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

How big is battery energy storage in Europe?

That came off the back of the industry deploying 21.9GWh of battery energy storage systems (BESS) across Europe with about 18.5GWh in the EU in 2024, including utility-scale, commercial and industrial (C&I) and residential. It marked the 11 th consecutive year of record-breaking growth.
