

# **Which lighting uninterruptible power supply is the best**

## Overview

---

How do I choose the right uninterruptible power supply (UPS)?

Selecting the right Uninterruptible Power Supply (UPS) requires understanding your specific power needs. We'll guide you through the key factors to consider when purchasing a UPS system. First, calculate the total power draw of equipment you need to protect. Add up the wattage of all devices to determine the minimum capacity needed.

How do I choose a backup lighting system?

Review the specs on our UPS systems to find a match for your backup lighting needs. Then, choose from standard lead acid or lithium ion battery power options. With reliable UPS systems powering your emergency lighting systems, you'll be able to navigate outages safely. Learn more about two of our top UPS models for emergency backup lighting.

Should I buy the best ups?

These days many of us are working from home, so buying the best UPS your budget can stretch to is even more important. You may find that you're plugging in a lot more power-hungry devices into your home power supply, and this could lead to power cuts or power surges.

What is a good UPS voltage?

600-900VA UPS: Best for single computers, monitors, and routers. Expect 10-30 minutes of backup time. 1000-1500VA UPS: Ideal for home offices, small businesses, or setups with multiple devices. 1500VA+ or Online UPS: Needed for servers, high-end gaming PCs, NAS storage, or professional AV systems.
