

Wholesale substation breaker in Italy

Overview

What does a substation do?

The substations represent the first phase of power distribution: from the transmission line to the substation. Power lines convey power, the substations convert it. REBAIOLI S.p.A. normally undertakes electromechanical work, at the offices, to check the opening of substations and interferences.

What is the construction of electrical substations?

The work for the construction of electrical substations consists in the construction of reinforced concrete structures, namely containment walls and/or fencing, foundations for electrical equipment, factory parts necessary to enclose the power and tele-control electromechanical equipment, as well as all the apparatus necessary for their operation.

How does a substation convert power to 66 kV?

From here another network leads to the smaller, medium/low voltage cabins where it is converted from 130 kV to 66 KV or medium voltage. The substations represent the first phase of power distribution: from the transmission line to the substation. Power lines convey power, the substations convert it.
