How does a solar air conditioner work?

A solar air conditioner combines solar electricity and air conditioning. In simple words, it takes energy from the Sun and uses it to power your AC to cool your space! A solar panel is a device that captures the power of the Sun. It converts the Sun rays into electrical energy. This energy can then be used directly or stored in a battery.

How much does it cost to install a solar-powered air conditioner?

Installation costs of solar-powered air conditioners can be a bit varied. The exact amount depends on the number of air conditioners, the number of solar panels required, and a few other variables. Solar-powered air conditioners can cost \$2000 before installation while around \$5000 including installation.

Why do we need solar-powered air conditioners?

The need for solar-powered air conditioners is vital considering how according to energy.gov, three-quarters of homes in the US use air conditioning which consumes about 6% of total electricity usage costing \$29 billion annually and releasing 117 million metric tons of carbon dioxide!
